<p><b>Background Information:</b> Insert as much information as possible so that councillors have the detail that they need in order to make an informed decision</p>	<p>A building firm were contacted in regard to building a replacement stone bridge, they have estimated the price at about £10,000 and are happy to carry out a detailed estimate for the bridge but felt that a structural engineers report should be obtained first. This is due to the structural weight of the bridge will be a lot different from the existing timber one and as assessment would need to be made as to whether the existing concrete pads stones that are currently each side of the riverbank are structurally strong enough to take the new load bearing.</p>
