DRAFT

Initial report on implementation of AutoSpeedWatch Cameras in the village

### **Background**

Following ongoing complaints about speeding vehicles on village roads and the difficulties in maintaining an active and reliable Community Speedwatch Group, the Parish Council decided to purchase and install two AutoSpeedWatch cameras.

### **Installations**

The cameras have been installed on BT poles on two of the main four routes into the village centre; both around 60 metres from the start of the 30mph limit.

Locations are:

Coalpit Lane Southbound. The camera is set to trigger over 35 mph.

Long Cross Bottom Northbound. The camera is set to trigger over 38 mph.

The cameras only record during daylight hours. They take a picture of the rear of vehicles exceeding the trigger speed. The system also flags vehicles with lapsed tax and / or MOT.

### **Monitoring**

Councillors Simon Collins and Peter Rhodes have access to the data and are responsible for verifying pictures taken of individual vehicles.

### **Results to date**

Since installation at the end of January 2024 the cameras have recorded 162 instances of speeding above the camera trigger speeds including:

- 44 instances over 40mph (one at 50mph)
- 52 instances at 37mph and 38mmph

10 vehicles have been recorded more than once (listed as persistent). Most twice but one three times.

The busiest times for speeders is mainly weekday afternoons.

### **Police**

Councillors, Rhodes & Collins met the local PCSO's, the local Frome-based policeman and Ashley Reay who is the main coordinator of Community Speedwatch at the Knatchbull Arms recently.

It turned out they were all aware of our purchase of the cameras and in fact the PCSO and Ashely Reay had already been monitoring our data via AutoSpeedWatch.

### **Conclusions**

Realistically, compared to other installations in our area, the feedback we received is that the numbers of speeding vehicles we are seeing is relatively low. However, that doesn't mean that the Police Speed Enforcement Unit will not take an interest if as we continue to collect data it shows speeding is a real problem in the village.

The advice is to collect and monitor the data for the coming months and build a concrete picture of the speeding levels in the village.

## **Speed Indicator Devices**

Ashley Reay told us that from time to time there may be money available to fund SID's. He promised to let us know the next time that happens and I've emailed to remind him.
